

32S Canvas and Plaited Twill
©Laurie Autio

A variant of an original design woven for the Complex Weavers Lace Study Group Exchange in 2008. The design includes diagonal bands of canvas with shaded plaited twills. There is a color reversal just below the center. The draft was woven on a computer-controlled 32-Shaft LeClerc Weavebird. It would take 64 treadles and very long legs to weave manually!
